

Paige Berube

Paige Berube joined the Ocean Protection Council (OPC) in January 2016. Her work focuses on supporting the sustainable management of California's marine fisheries. She began working with the OPC as a Sea Grant Fellow focusing on climate change policy, including sea level rise and ocean acidification and hypoxia. Before the OPC, Paige worked as a Research Fellow with the Sustainable Fisheries Group at UC Santa Barbara, where she served as the Lead Consultant on a markets project to facilitate the sustainable management of small-scale fisheries in the developing tropics. Paige earned her master's in Environmental Science & Management from the Bren School at UC Santa Barbara and a B.S. in Environmental Geoscience from Boston College. Working with NOAA and The Nature Conservancy, her master's thesis group project evaluated management scenarios in the California commercial swordfish fishery, focusing on balancing conservation and economic goals through a global lens. She enjoys going on ocean swims, playing soccer, and cooking up fresh fish tacos.
